Across two products, your audience is worth

\$58,356
to **\$87,534**

A \$39 handbook. A \$200 complete compost system.

Right now that attention turns into likes and comments. A 227,000-view reel proves you can hold a crowd; one structured product turns the crowd into soil builders who paid to learn your method.

on that one post

\$73k

from the \$200 system
alone, optimistic case

Inside: what your content reveals · the maths behind the figure · the two-tier value ladder · product paths · a six-phase launch · a demand test to post this week

Your audience wants *your method, not more tips.*

I went through your recent reels. Three themes stand out, and each one points to something your followers would pay for.

THEME 1

SALES POTENTIAL

Composting as a lifestyle, not a chore

HIGH

227,000+ **7,527** **207**

views · Reel 1

likes

comments

Your highest-performing angle by a wide margin. People connect with the identity of it: waste reduction as something you enjoy, not a guilt trip. An audience that adopts your identity is ready to adopt your exact method.

THEME 2

SALES POTENTIAL

Food-waste autonomy & environmental sovereignty

HIGH

525 **33**

likes · Reel 2

comments

Taking control of your own waste without waiting for councils or regulations strikes a deep chord. These followers don't want casual tips; they want self-reliance and the pride of building their own soil.

THEME 3

SALES POTENTIAL

DIY bin builds & low-maintenance setups

MEDIUM

598 **34**

likes · Reel 5, rain barrel conversion

comments

Strong practical interest in passive airflow and setups that don't need heavy turning. This is the buyer who wants a physical blueprint for a small space, a tight schedule or limited mobility.

VERDICT

The engagement on your lifestyle and DIY bin content proves pent-up demand. People already want to compost; what stalls them is the fear of smells, pests and getting the balance wrong. A structured, proven system that removes those fears has a high probability of selling, and the test on the last page confirms it before you build anything.

Where the number *comes from.*

Conservative market metrics applied to your audience. No hype, just the funnel.

48,846

Follower base

Your current audience on Instagram.

2,442

Engaged audience

5% of followers. The people who watch to the end, comment and reply to stories.

244 – 366

Estimated buyers

10% to 15% of the engaged audience converting on a launch.

\$200

Product price

One complete digital system. One price point, one launch.

CONSERVATIVE · 10%

$2,442 \times 10\% \times \200

\$48,840

OPTIMISTIC · 15%

$2,442 \times 15\% \times \200

\$73,260

\$48,840 – \$73,260 from a single core product. Every figure above is a stated assumption. The next page shows what a \$39 handbook adds underneath it, and the final page replaces the assumptions with real names before anything is built.

Two prices, *one audience.*

The same 2,442 engaged followers, met at two levels of commitment. The system is the core product; the handbook is the low-risk first step towards it.

ENTRY · \$39

The Zero-Odour Compost Handbook

A written guide to the browns-greens-airflow balance your content already teaches, with the passive-aeration bin build from your rain barrel reel. Low price, instant delivery, sold year-round from your bio and stories.

PRICE

\$39

BUYERS

244 – 366

10–15% of 2,442

REVENUE

\$9,516 – \$14,274

CORE · \$200

The Master Compost System

The complete step-by-step roadmap: design, balance and maintain a high-heat, odour-free system tailored to their space. Recorded once, launched in cohorts. Every handbook buyer is a warm candidate when doors open.

PRICE

\$200

BUYERS

10–15% of 2,442

REVENUE

\$48,840 – \$73,260

FULL LADDER · BOTH RUNNING

\$58,356 – \$87,534

Handbook plus system. Treat this as a ceiling, not a forecast: both tiers draw on the same 2,442 people, so some buyers appear in both rows. The realistic order is handbook first to build a buyer list, then the system launched to that list with the six-phase structure on page 6.

WHY THE HANDBOOK MATTERS MORE THAN ITS REVENUE

A \$39 buyer has already decided you're worth paying. Launching the \$200 system to a list of people who bought once converts far better than launching to followers who only liked a reel. The handbook's job is to build that list, not to be the business.

What you could sell *starting next month.*

Crossing what your content demonstrates with what your comments show people want.

OPTION 1 · THE BIG BET · \$200

The Master Compost System

WHAT IT IS

A complete step-by-step digital roadmap: design, balance and maintain a high-heat, odour-free compost system tailored to their space and lifestyle.

WHO IT'S FOR

Eco-conscious gardeners and homeowners who want to divert kitchen waste but are afraid of pests, smells or neighbour complaints.

WHY IT SELLS

Solves the primary barrier in your comments: people want to compost but stall because they lack an exact balance formula for browns, greens and airflow.

OPTION 2

The Small-Space & Zero-Turn Playbook

WHAT IT IS

A specialised implementation guide: DIY passive-aeration bin builds, apartment Bokashi fermentation and vermicomposting setups.

WHO IT'S FOR

Renters, urban dwellers and anyone with limited mobility who cannot turn a heavy pile.

WHY IT SELLS

Your rain barrel reel proved this audience exists. A natural second product once the system has a first cohort.

OPTION 3

The 30-Day Scraps to Soil Challenge

WHAT IT IS

A structured 30-day digital sprint with weekly milestones: waste audit, bin setup, microbial activation and first batch curing.

WHO IT'S FOR

Beginners who need accountability to start now instead of letting food rot in landfill.

WHY IT SELLS

Action-oriented and time-boxed. Easy to launch as a live round, easy to run again.

How we'd launch *the system.*

Six phases. Each one builds the belief needed for the next. The close at the end must be real; reopening destroys credibility for the next launch.

1 Build up

Engage the community and signal that something is coming. Interactive stories, polls and Q&A; boxes on the smells, pests and confusion that stop people starting, alongside your own soil results.

2 Invitation

Announce it and invite the audience into a private WhatsApp or Telegram group where the details will be shared first. Mention a time-limited bonus for that group.

3 Anticipation

Build curiosity inside the group. Share the transformation people can expect and make the timeline crystal clear so everyone is ready the moment doors open.

4 Reveal

The full breakdown: what's included, the bonus, the price and the open/close dates. Leave no doubt about what's on the table.

5 Conversion

Send the enrolment link, run a poll to see who's in or has questions, and follow up one-to-one in the DMs with everyone who raises a hand. This is where most sales happen.

6 Urgency

Countdown messages at 24h, 12h, 6h, 2h and closed. Make them picture another year of scraps going in the bin. Then close for real.

WHY THIS ORDER

Nothing is sold until the audience has raised a hand three times: in stories, in the group and in the DMs. By the time the link goes out, the people buying have already decided.

Post this before *building anything.*

One carousel. Black background, white text. If the replies come in, we build. If they don't, you've spent ten minutes and we've learned something.

SLIDE 1 · THE HOOK

You want to compost
your kitchen scraps.

You just don't want a
stinky pile of rotting food
attracting rats to your
back door.

SLIDE 2 · THE AGITATION

It's not your fault.

Most guides make composting
look like an organic chemistry
degree, or tell you to spend
hundreds on plastic tumblers
that don't work.

Get passive airflow and carbon
balance right and your pile
never smells. It just turns
into rich, black soil.

SLIDE 3 · THE ASK

I put together my exact,
foolproof blueprint to set up
a zero-odour compost system
in any backyard in under
one weekend.

Reply 'I WANT'
if this resonates with you.

WHAT THE REPLIES TELL US

Every 'I WANT' is a named buyer before a single module exists. That reply count becomes the real conversion figure, replacing the 10–15% assumption with your own data. Those names are the first people into the launch group, and the first people offered the \$39 handbook while the system is being built.

Ready when you are.
