AUDIENCE SNAPSHOT

WHAT YOUR NUMBERS SAY

You have built a workshop audience at scale: riders who watch you strip, fix and rebuild bikes, and who come back for the next one. Figures below are public profile data from your latest posts.

116,849

FOLLOWERS

1,344

POSTS

THE CONTENT THAT WORKS (LATEST 12 POSTS, PUBLIC VIEWS)

POST	VIEWS	LIKES
Profile Racing rear wheel rebuild, Amsterdam	286,019	8,584
Customising the rare Grape Soda BMX at the skatepark	189,917	2,798
Sunday Bikes 'Burn Slow' stem upgrade, inside the skatepark	69,996	1,059
S&M headset repair	38,273	1,555

YOUR THREE CONTENT PILLARS

01

**CUSTOM BUILDS
ON LOCATION**

Rare bikes rebuilt at the skatepark, in Amsterdam, in a secret spot. Your four biggest recent posts are all here.

02

**WORKSHOP
REPAIRS**

Headsets, wheels, stems and full restorations, the paid work your workshop already does.

03

**TOOLS AND HOW-
TOS**

The grip-install hack with @gt85spray and the 6mil Allen key set: method given away free.

THE OPPORTUNITY

THE GAP IN WHAT YOU OFFER

Your paid help only reaches bikes that physically get to your workshop. Your method reaches everyone who watches. Nothing sits in between.

OBSERVED

- ◆ About 117,000 followers watching detailed repair videos: grips, wheel rebuilds, tool reviews.
- ◆ A paid workshop service already exists, alongside your tool partnerships (@6miltools, @gt85spray) and the independent shop, @shifta.bike.
- ◆ There is no teaching product. The method is free in the videos; paid help needs the bike on your bench.

INFERRED, NOT YET CONFIRMED

- ◆ Some viewers can't use the workshop because of distance or your capacity.
- ◆ You haven't said how many. This audit treats it as the question to test, not a fact.

IN YOUR WORDS (DM, 24/09)

You pick each job by "what the bike actually needs, what will make the biggest difference to the rider, and what will make an interesting transformation to film", and you try "to keep it genuine rather than forcing a repair purely for content".

You already take on "paid BMX repairs, restorations and custom builds through my workshop".

THE TRANSFORMATION YOU COULD SELL

Riders who can't get their bike to you become riders who can **diagnose, repair and upgrade their own bikes** with workshop-grade technique and the right tools.

Verdict: the free videos already show the method. The gap is a structured, paid version for riders who want to do the job themselves, step by step, on their own bike. It sits next to the workshop rather than competing with it.

THE WORKING

WHERE THE NUMBER COMES FROM

An estimate, not a promise. It starts from your public follower count and makes two stated assumptions, so you can check each one against your own sense of your riders.

STEP	WORKING	FIGURE
F · Followers	Public data	116,849
E · Engaged audience	5% of 116,849 = 5,842.45, rounded down	5,842
B · Buyers	5% of 5,842 = 292.1, rounded down	292

THE FOUR PRODUCTS, SOLD TO THE SAME 292 BUYERS

PRODUCT	PRICE	BUYERS	REVENUE (ESTIMATE)
Ebook: the T77 Workshop Manual	\$29	292	\$8,468
Online course: Workshop-at-Home	\$200	292	\$58,400
Group coaching: the Restoration Crew	\$500	292	\$146,000
1:1 coaching: Your Bike, Your Build	\$1,500	292	\$438,000

MINIMUM · EBOOK

\$8,468

292 × \$29 = \$8,468

MAXIMUM · ONE-TO-ONE

\$438,000

292 × \$1,500 = \$438,000

THE WORKING, CONTINUED

THE AVERAGES

Three ways to sit in the middle of the range, each worked from the four product figures on the previous page.

MEASURE	WORKING	ESTIMATE
Median	Middle two figures: $(\$58,400 + \$146,000) \div 2$, or $292 \times \$350$	\$102,200
Mean	$(\$8,468 + \$58,400 + \$146,000 + \$438,000) \div 4 = \$650,868 \div 4$, or $292 \times \$557.25$	\$162,717
Mid-range	$(\$8,468 + \$438,000) \div 2$, or $292 \times \$764.50$	\$223,234

EACH PRODUCT, ON ONE SCALE

WHY 292 BUYERS IS CAUTIOUS

292 is about one in five of the people who like a typical post of yours (1,344 average likes, public data), and a fraction of the 8,584 who liked the Amsterdam wheel rebuild. It does not need a viral launch to land.

WHAT IS NOT COUNTED

Affiliate income from the tool list inside the course, and the workshop service you already run. Neither is estimated here; every figure above stands on the four products alone.

The real test of the 292 is the "BUILD" comment count on page 11.

WHAT TO SELL

THE PRODUCT LADDER

Four products in price order, each built on the repair and restoration work you already film. They sit beside the workshop, not on top of it.

01

EBOOK: THE T77 WORKSHOP MANUAL

\$29

Your repair method written up as a bench manual: diagnosis, headsets, wheel rebuilds, stems and grips. It is written for you from your videos; you only cross-check it and write none of it yourself. For riders who want the fix in front of them while the bike is on the stand.

\$8,468 EST.

02

ONLINE COURSE: THE WORKSHOP-AT-HOME SERIES

\$200

The main idea. One full restoration, stripped frame to finished bike, filmed the way you already film and broken into steps, with the tool list inside. For riders who watch the free videos and want to do the whole job themselves, but can't get their bike to you.

\$58,400 EST.

03

GROUP COACHING: THE RESTORATION CREW

\$500

An online group programme, as many riders as you choose, each restoring their own bike alongside the others, with live sessions where you look at their bikes on camera. For riders who want your eye on their own bike, not just a video of yours.

\$146,000 EST.

04

1:1 COACHING: YOUR BIKE, YOUR BUILD

\$1,500

An 8-week one-to-one online programme taking one rider through the restoration or custom build of their own bike, from diagnosis to finished build. For riders with a rare or custom bike who would send it to you if they could.

\$438,000 EST.

Each revenue figure is an estimate: 292 buyers (5% of the 5% of followers who engage) × the price.

WHAT TO SELL, CONTINUED

THE LADDER AT A GLANCE

PRODUCT	FOR WHOM	PRICE	REVENUE (ESTIMATE)
T77 Workshop Manual (ebook)	Riders fixing common jobs at home	\$29	\$8,468
Workshop-at-Home Series (course)	Riders who can't reach the workshop	\$200	\$58,400
The Restoration Crew (group)	Riders who want you to see their bike	\$500	\$146,000
Your Bike, Your Build (1:1, 8 weeks)	Riders with a rare or custom bike	\$1,500	\$438,000
Tool list inside the course	Every course buyer	In course	Not estimated
Workshop service	Riders who can bring their bike	Existing	Not estimated

ALREADY IN PLACE, KEPT AS IT IS

00

YOUR WORKSHOP SERVICE

Already running. Paid repairs, restorations and custom builds for riders who can bring their bike to you. Unchanged by this plan.

Existing
NOT ESTIMATED

+

THE TOOL LIST INSIDE THE COURSE

Each lesson lists the exact tools used, linked through the affiliate partnerships you already have. It turns those relationships into part of the product rather than a separate link in bio.

AFFILIATE

OFFER DETAIL

PRODUCT 01 · EBOOK · \$29

THE T77 WORKSHOP MANUAL

Inside: a diagnosis checklist built on the first question you ask on every job, what the bike actually needs, then step-by-step write-ups of the repairs you already show: headsets, wheel rebuilds, stems and bar-end grips, each with its tool list. It is written for you from your videos and workshop method; you only cross-check it for accuracy and write none of it yourself.

The promise: fix the common jobs on your own bike with the manual open on the bench. **First step:** pick the repair videos it should draw from and hand them over to be written up.

PRODUCT 02 · ONLINE COURSE · \$200

THE WORKSHOP-AT-HOME SERIES

One full restoration from stripped frame to finished bike. It is the same work you already film, sequenced and finished properly, with each step broken out:

- 1 Diagnosis.** What the bike actually needs, the first question you already ask on every job.
- 2 What to replace and why.** The decisions that make the biggest difference to the rider.
- 3 Tools.** The exact kit for each step, linked through your affiliate partnerships, such as the @6miltools Allen keys and @gt85spray you already feature, at the moment a rider needs it.
- 4 The order of work.** Strip, repair, rebuild, in the sequence a workshop uses.

The promise: do the whole job yourself, step by step, on your own bike.

Why it fits you: it keeps your own rule of choosing work that genuinely matters to the bike, rather than forcing a repair for content. **First step:** pick one restoration you are already planning to film, film it with the course in mind, and note every tool as you go.

OFFER DETAIL, CONTINUED

PRODUCT 03 · GROUP COACHING · \$500

THE RESTORATION CREW

Inside: an online group programme, with as many riders as you choose, each restoring their own bike alongside the others. Each rider works through the course steps on their bike, and in live sessions you diagnose their bikes on camera, answer what to replace and why, and check the order of work before they commit.

The promise: your eye on my bike, not just a video of yours.

First step: ask the course waitlist who would want you to look at their own bike as they go, and set the group size from the replies.

PRODUCT 04 · 1:1 COACHING · \$1,500

YOUR BIKE, YOUR BUILD

Inside: an 8-week one-to-one online programme. One rider, one bike, weekly calls from diagnosis to finished build: weeks 1-2 strip and diagnose, weeks 3-6 parts, repair and upgrades, weeks 7-8 rebuild and set-up. You pick the work the way you already do, by what the bike actually needs and what will make the biggest difference to the rider.

The promise: a workshop-grade restoration of your own bike, done with your own hands.

First step: when riders DM you about a bike too far away to send in, offer them a place, and take only as many as your workshop time allows.

THE SEQUENCE

LAUNCH PLAN

Four steps, in this order. Nothing gets built until your riders have told you they want it.

01 ASK FIRST

Run a story poll or question box asking riders whether they would rather send their bike in or learn to do the job themselves. Then post the test carousel on the next page. This tests demand before anything is built.

02 FILM ONE RESTORATION FOR THE SERIES

Pick one restoration project you are already planning to film, and film it with the series in mind: diagnosis, parts, tools and order of work captured as separate steps.

03 WAITLIST, THEN A REAL LAUNCH

Invite interested riders, starting with everyone who commented "BUILD", to a waitlist. Open the series to them first, with a clear launch date and a real close.

04 DECIDE ON A SECOND SERIES

Use the replies and waitlist numbers to decide whether a second series is worth making.

WHAT TO WATCH

The model assumes 292 buyers: 5% of the 5,842 followers it counts as engaged. Your poll replies, "BUILD" comments and waitlist sign-ups are the first real evidence for or against that, so count them before you film.

IMMEDIATE VALIDATION

THE FIRST POST

Post this as a carousel, or use it as a short reel caption over workshop footage, before building anything.

SLIDE 1

**CAN'T GET YOUR BMX TO
A WORKSHOP?**

t77bmx

SLIDE 2

**EVERY WEEK I STRIP, FIX AND
REBUILD BIKES LIKE THIS
ONE. MOST OF YOU WATCH
FROM TOO FAR AWAY TO SEND
YOURS IN.**

Workshop

SLIDE 3

**I'M THINKING OF FILMING
ONE FULL RESTORATION,
EVERY STEP, SO YOU CAN DO
IT ON YOUR OWN BIKE.**

Every step

SLIDE 4

**COMMENT "BUILD"
IF YOU'D WANT IT.**

BUILD

HOW TO READ IT

The number of "BUILD" comments is the demand test. Put a restoration you have just finished behind slide 1, so the post looks like the rest of your feed.

NEXT

WHAT TO DO NEXT

- ◆ **This week:** run the story poll and post the "BUILD" carousel.
- ◆ **Count:** poll replies and "BUILD" comments. That is your demand test.
- ◆ **Then:** choose the restoration you were already going to film, and film it as the series.

LET'S TALK IT THROUGH

Reply to this DM and I'll walk you through the numbers and what to build first.

Prepared by **Euan Grant** · Autora AI Automation · October 2026

All figures are estimates based on public profile data and this audit. Each one shows the assumption behind it; none is a promise of results.

How this was made: Euan builds automations and used AI for the analysis, which is why this took an evening rather than a fortnight.
