Three content pillars

SEASONAL BAKING

Sourdough, apple spice cake, caramelised banana cake, honeynut Bundt, pumpkin buns. Your highest-liked posts.

HERBS AND PRODUCE

Chicken salad with tarragon and grapes, herby cream cheese tarts, heirloom tomatoes. Where your herb thinking shows.

THE KITCHEN COUNTER

LA heatwaves, rainstorms, the new horse routine, and "Happy Monday, my dear friends". The voice people come back for.

THE OPPORTUNITY

A way of thinking *worth teaching*

Your niche is seasonal recipe development and food styling. The thing you can teach sits underneath the recipes: how you decide what a herb is there to do.

"I try and think about seasonality, and what I want the herbs to accomplish within the dish, ie. be a dominant flavor, or one that complements the rest of the ingredients"

Marissa, in a message to Autora, 01/10

The transformation

From home cooks who follow your recipes, to cooks who know why flavours and herbs work and can build their own dishes. Season first, then the herb's job: lead or support.

OBSERVED

- About 49,300 followers for original seasonal recipes, such as the 28/09 chicken salad with tarragon and grapes.
- No paid offer is visible.
- Your main focus today is styling and photography work.

NOT YET CONFIRMED

That your followers want to cook without a recipe, using your way of thinking. It is not confirmed, so it is the question to test first, before anything is built (page 11).

VERDICT

You have a clear, teachable way of thinking about flavour: season first, then the herb's job. That turns into products at every price point, from a \$29 guide to one-to-one mentoring.

THE WORKING

THE WORKING, CONTINUED

Coaching, and the *averages*

GROUP COACHING · \$500 Per 8-week cohort: 2 x \$500 = \$1,000 to 8 x \$500 = \$4,000. Per year: six cohorts x 8 places = 48 places. 123 buyers fill all 48, so 48 x \$500 = \$24,000.	ONE-TO-ONE · \$1,500 Per 8 weeks: 1 x \$1,500 = \$1,500 to 20 x \$1,500 = \$30,000 (1 to 20 hours a week). Per year: six blocks x 20 clients = 120 programmes. 123 buyers fill all 120, so 120 x \$1,500 = \$180,000.

The range and the averages

Minimum · the ebook sales 123 x \$29	\$3,567
Maximum · a full year of one-to-one 120 x \$1,500 (bigger than the group year, \$24,000, and the course, \$24,600)	\$180,000
Median Figures in order: \$2,500, \$3,567, \$15,750, \$24,600. (\$3,567 + \$15,750) / 2	\$9,658.50
Mean (\$3,567 + \$24,600 + \$2,500 + \$15,750) / 4 = \$46,417 / 4	\$11,604.25
Mid-range (\$3,567 + \$180,000) / 2	\$91,783.50

For the median and mean, each coaching product is counted at the middle of its 8-week range: group (\$1,000 + \$4,000) / 2 = \$2,500; one-to-one (\$1,500 + \$30,000) / 2 = \$15,750. The mid-range uses the year maximum. All figures are estimates.

LAUNCH PLAN

Ask first, *then build*

Three steps, in this order. Nothing is built until your followers have told you what they need.

1

FIRST · STORIES

Ask the question

Post a story question: which ingredient do you never know what to pair with? Run the test post on the next page alongside it. Fall produce is already on your mind and theirs: apples, pumpkin, grapes, honeynut squash.

2

NEXT · YOUR KITCHEN

Film the course around the answers

Take the ingredients people name most and build the Cook by Season lessons around them. You film; Aurora turns the footage into the course. The herb-pairing guide is written from your posts at the same time.

3

THEN · FEED AND STORIES

Waitlist, then a dated launch

Open a waitlist, then launch with a clear date and a real close. Everyone who commented "HERBS" or answered the story question hears first.

WHY THIS ORDER

The demand for cooking without a recipe is not yet confirmed. The question and the test post confirm it, and tell you which dishes to teach, before you spend a day filming.

THE FIRST POST

Lead or *support*?

A four-slide carousel that tests the demand before anything is built. Shoot it the way you shoot every post: a herb on the counter, warm light.

1 Lead or support?

2 Before I add a herb, I decide its job: the dominant flavour, or one that complements everything else.

3 I'm thinking of a short guide to pairing herbs with the season, so you can cook without a recipe.

4 Comment "HERBS" if you'd want it.

CAPTION, IN YOUR VOICE

Every herb in my recipes, like the tarragon in my chicken salad with grapes, has a job before it goes in. I think about the season first, then what I want the herb to accomplish: be the dominant flavour, or complement the rest of the ingredients. I'm thinking of putting that into a little guide so you can cook without a recipe. Comment "HERBS" if you'd want it. Happy Friday, my dear friends.

Read the result: count the "HERBS" comments and the story answers. That is the demand signal, and it shapes the guide and the course.

WHAT TO DO NEXT

Post the question. Count the *HERBS*. Then we build.

THIS WEEK

Run the story question and the four-slide test post.

WITH THE ANSWERS

Autora drafts the herb-pairing guide; you plan the lessons.

THEN

Film, open the waitlist, launch on a date with a real close.

Reply to this DM and I'll walk you through the numbers and what to build first.

All figures are estimates based on public profile data and this audit, using a fixed model: 5% of followers engaged, 5% of those buy.

How this was made: I build automations, and used AI for the analysis, which is why this took an evening rather than a fortnight.
