@CLAYBAE97 · 76,816 FOLLOWERS · CAPE TOWN

Comfort cooking, honest kitchen talk and Sunday hospitality — you turn weeknight kitchen anxiety into food people actually sit down for.

CONSERVATIVE REVENUE POTENTIAL

\$57,615

ESTIMATE

Not a promise. A calculation you can check on page 03.

One \$150 product, bought by 10% of the 3,841 followers who already engage with you (5% of 76,816). The optimistic case sits inside this document — never on the cover.

WHAT'S INSIDE

- What your numbers say
- Offer detail, product by product
- Where the number comes from
- A six-phase launch plan
- The product ladder
- The first post to publish

SECTION ONE

What your numbers say

Public profile data plus the engagement figures from the audit sample.
Nothing on this page is projected — it has already happened.

76,816

FOLLOWERS

1.58%

ENGAGEMENT RATE

392

POSTS PUBLISHED

1,191

AVERAGE LIKES

21

AVERAGE COMMENTS

12/12

RECENT POSTS ARE VIDEO

The lane is already obvious

Your average reel lands around 1,191 likes. The homemade pasta reel on 17 September did 3,874 likes on 35,253 views off one line of caption — more than three times your average. In the wider sample this audit used, a homemade pasta reel reached 12,580 likes, 114 comments and over 506,000 views. Same subject, twice, both times your best. That is not luck, that is demand.

Your three pillars

PILLAR	EVIDENCE IN THE SAMPLE	SALES POTENTIAL
Date-night comfort & homemade cooking	12,580 likes, 114 comments, 506,000+ views on the homemade pasta reel	High
Real kitchen honesty vs viral hacks	2,907 likes, 155 comments on the boiled lemon cake fail — highest comment density in the sample	High
Cultural comfort & Sunday hospitality	6,073 likes, 57 comments on the Sunday celebration reel	Medium

The transformation you sell is not recipes. It is turning weeknight kitchen anxiety and wasted ingredients into soulful home dining that brings people to the table.

WHAT YOUR NUMBERS SAY

AUTORA AI AUTOMATION

SECTION TWO

Where the number comes from

Four assumptions and one multiplication. If you disagree with an assumption, change it and the number moves – that is the point of showing it.

INPUT	BASIS	VALUE
Follower base	Public profile data	76,816
Engaged audience	5% market premise used throughout this audit	3,841
Buyers, conservative	10% of the engaged audience	384
Buyers, optimistic	15% of the engaged audience	576
Product price	The flagship system, one payment	\$150

CONSERVATIVE · THE COVER NUMBER

$$3,841 \times 10\% \times \$150$$

\$57,615

Estimate. 384 buyers.

OPTIMISTIC · THE CEILING

$$3,841 \times 15\% \times \$150$$

\$86,423

Estimate. 576 buyers. Kept off the cover deliberately.

Why 5% engaged when your rate reads 1.58%?

The 1.58% is per post – the share of followers who like or comment on a single reel. The 5% engaged audience counts the people who interact with you across posts over time, which is always the larger group. It is a market premise, not a measured figure from your account, and it is the single assumption most worth testing before you build anything.

SECTION TWO, CONTINUED

If the assumptions are wrong

Same engaged audience, same \$150 price, three conversion rates. The middle row is the cover number. The top row is what happens if conversion comes in at half the conservative case.

CONVERSION OF ENGAGED AUDIENCE	BUYERS	REVENUE (ESTIMATE)
5% — half the conservative case	192	\$28,808
10% — conservative, the cover figure	384	\$57,615
15% — optimistic	576	\$86,423

What has to be true

- One product, one price, one real open and close window — not an always-on link in bio.
- The demand test on page 10 brings back replies in volume, not polite likes.
- You answer the DMs yourself. Your trust is the product; a link cannot carry it.
- The offer stays on pasta, comfort food and hosting — the three things already proven.

What is not counted

- Brand partnerships and television work. This audit does not touch that income.
- Repeat purchases or a second launch to the same list.
- The lower-priced products on the ladder, which share these buyers rather than adding to them.
- Followers gained between now and launch.

Every figure on this page is an estimate derived from the inputs on page 03. Nothing here is a forecast of guaranteed income.

SECTION THREE

The product ladder

Three routes, drawn from what your content already proves. The flagship at \$150 is the one the headline number rests on; the other two prices are suggested, sized to sit sensibly beneath it.

PRODUCT	PRICEWHO IT IS FOR	REVENUE RANGE (ESTIMATE)
The Soulful Home Cook System The big bet — complete culinary program	\$150 Food enthusiasts and young professionals cooking to impress partners and friends	\$57,615 – \$86,423
The Weekday Flavor Blueprint Guide and recipe system, under 30 minutes	\$29 People stuck on weeknight routine, pantry staples and leftovers	\$11,139 – \$16,708
The Host's Weekend Playbook Intensive video mini-course on hosting	\$97 Sunday hosts and anyone cooking for a table of people	\$37,258 – \$55,887

Formula for every row: 3,841 engaged followers × 10% (low) or 15% (high) × price. Same buyer band across all three so the comparison is honest.

Read this before you pick

These are three routes to the same buyers, not three revenue streams to add together. Adding the ranges would double-count the same 384 to 576 people. Build one, sell it properly, then let the others follow as the entry point and the upsell — the Blueprint at \$29 as the front door, the Playbook at \$97 for the Sunday crowd, the System at \$150 as the destination.

SECTION FOUR · OFFER ONE

The Soulful Home Cook System

\$150

THE BIG BET

384 – 576 buyers · \$57,615 – \$86,423 estimate

A complete culinary program teaching busy home cooks to master 15 core savoury comfort dishes, homemade pasta, and stress-free hosting menus.

What is inside

- 15 core savoury comfort dishes, filmed the way you actually cook them
- A homemade pasta module, start to finish — your single most-proven subject
- Flavour-base frameworks so people stop following recipes blind
- Two stress-free hosting menus with timings, including a Sunday table
- A shopping and prep system that stops good ingredients going in the bin
- The honest section: what goes wrong, and how to save it

The promise

Fifteen dishes you can cook without stress, and a table people want to stay at.

Why it sells

It solves the root frustration your comments already name — wasted ingredients and misleading online hacks — and delivers the exact confidence people saw in your pasta content.

The first step to build it

Film the pasta module first, because it is the only part of this already validated by 506,000 views. Then pre-sell the full system off that module with a real open and close date, and film the remaining dishes to a paid audience. You never build 15 dishes on a guess.

SECTION FOUR, CONTINUED · OFFERS TWO AND THREE

The lower rungs

\$29

The Weekday Flavor Blueprint

A practical guide and recipe system that turns pantry staples and leftovers into rich, flavourful meals in under 30 minutes. Where the System is about occasions, this is about Tuesday.

- The flavour-base method in writing, with swaps for what is already in the cupboard
- Fast weeknight recipes built around your budget-friendly and skillet content
- A one-page routine: shop once, prep once, eat well all week

First step: write it from the captions and comments you already have, and sell it as the front door to the System. Estimate at the same buyer band: \$11,139 – \$16,708.

\$97

The Host's Weekend Playbook

An intensive video mini-course on complete meal prep, timeline management and signature drinks for Sunday gatherings and intimate dinners. Built for the event, not the everyday.

- Two full hosting timelines, counted back from the moment guests arrive
- Prep-ahead map so you are not cooking while people are in the room
- Signature drinks and the Sunday table, straight out of your hospitality content

First step: film one full Sunday from prep to plating as a single hosting case study. Estimate at the same buyer band: \$37,258 – \$55,887.

Prices for these two are suggested, not taken from the audit's headline maths. They are sized to sit under the \$150 flagship without cannibalising it.

SECTION FIVE

Launch plan: phases one to three

Six phases, run in order. The first three happen in public and in stories, before anything is for sale.

Phase 1 • Build up

Engage the community and tease that something big is coming. High interaction is the only goal — no selling yet.

What to post: interactive stories on the pain points — polls on which viral recipe wasted their money, a Q&A box on the dish they keep getting wrong, and a repost of your own kitchen fail with what you learned. Reply to every box.

Phase 2 • Invitation

Announce that it is on the way and invite your audience into a private group — WhatsApp or Telegram — where all the details will be revealed first.

What to post: one feed post and a story series with the group link, plus the tease of a time-limited bonus that only exists inside the group.

Phase 3 • Anticipation

Build curiosity inside the group. Tease what is coming, show the results people can achieve, and make the timeline crystal clear so everyone is ready to act the moment doors open.

What to post: short clips from the pasta module, the exact dates doors open and close, and a daily question that keeps the group talking.

SECTION FIVE, CONTINUED

Launch plan: phases four to six

This is where the \$57,615 estimate is either earned or lost. Most of it happens one message at a time.

Phase 4 • Reveal

Deliver the full breakdown: what is included, the exclusive bonus, the price, and the open and close dates. Leave no doubt about what is on offer.

What to post: one long-form video in the group, then the same offer summarised in the feed for anyone outside it.

Phase 5 • Conversion

Send the enrolment link, run a poll to see who is in and who has questions, then follow up one-to-one in the DMs with everyone who raises a hand. That is where most conversions happen.

What to post: a two-option poll — "I'm in" / "I have a question" — and a personal reply to every single question, in your own voice.

Phase 6 • Urgency

Countdown messages at 24h, 12h, 6h, 2h and closed, each one making them picture exactly what they lose by staying out.

Non-negotiable: the close must be real. Reopening after a deadline destroys the credibility you need for the next launch, and your trust is the whole asset here.

SECTION SIX

The first post

Publish this before you build anything. A simple carousel — black background, white text — to test whether the demand is real.

SLIDE 1 · THE HOOK

You waste money on viral recipes that never work. And dinner still ends up frustrating.

SLIDE 2 · THE AGITATION

It is not your fault. Social media feeds you 30-second gimmicks that look pretty but ruin good ingredients. What you actually need is a simple way to build deep flavour without second-guessing every step.

SLIDE 3 · CURIOSITY AND CALL TO ACTION

I am putting together a simple system covering the exact savoury frameworks and pasta techniques I use to cook stress-free every week. Reply "I WANT" if this makes sense.

Optional story follow-up

Same day, in your voice, using the phrasing your audience already answers to.

"Bafazi, quick one. How many times have you followed a viral recipe and thrown good food away?" — poll: *too many / don't ask*

"If I put the pasta and the savoury frameworks in one place, would you use it?" — reply box.

What to watch

Count replies, not likes. A reel of yours can do 3,874 likes and mean very little; fifty people typing "I WANT" means a lot.

Treat fifty genuine replies as the green light to film the pasta module. Under that, keep testing the hook rather than building the product.

CLOSING

What to do next

Three things, in this order

- **Post the carousel on page 10.** This week, before a single minute of filming.
- **Open the group.** Move everyone who replies into WhatsApp or Telegram so the launch has somewhere to land.
- **Film the pasta module.** It is the one piece of the \$150 system your audience has already voted for twice.

Reply to this DM and I'll walk you through the numbers and what to build first.

Prepared by Euan Grant · Autora AI Automation · September 2026

All revenue figures in this document are estimates based on your public profile data and the audit analysis. They are calculations from stated assumptions, not guarantees of income – the assumptions are all on pages 03 and 04 so you can push back on any of them.

How this was made: I build automations for a living, and used AI to do the content and engagement analysis behind it. That is why this took an evening rather than a fortnight.
