

Leanne Townsend

@wildfoodstory · 20,450 followers (public data) · North East Scotland

A forager and food writer in North East Scotland who reads the habitat and the weather to know where to look, then cooks what turns up.

WHAT YOUR AUDIENCE COULD BE WORTH · ESTIMATE

\$1,479 *to* \$76,500 ESTIMATE

The bottom of the range is the ebook sales; the top is a full year of one-to-one coaching, capped at your 51 estimated buyers ($51 \times \$1,500$).

\$6,350

MEDIAN · ESTIMATE

\$38,990

MID-RANGE · ESTIMATE

(minimum + maximum) $\div$ 2

Assumptions: 5% of followers are engaged and 5% of those buy; group coaching is 2 to 8 people per 8-week cohort; one-to-one is 1 to 20 hours a week; the maximum is a full year of six 8-week blocks. Lighter bars show the rest of a year.

You film the forays and run the sessions. We host and run everything else, with nothing to pay upfront.

WHAT YOUR NUMBERS SAY

People come for the *why* and the *where*.

You already advertise private and group events in your bio. Those teach in person, a few people at a time. Your account shows the same skill on screen, to a much wider audience.

public data

The content that works (public data, recent posts)

POST	LIKES	COMMENTS	VIEWS
Why you are a lifelong forager (carousel)	1,946	109	–
First ceps of the year in spruce, plus the odd one out (reel)	1,050	68	14,302
Fly agarics in North East Scotland conifer forest (reel)	320	13	2,336
Your research into foraging and wellbeing (carousel)	270	64	–

The ceps reel reached about 14,300 views, around ten times your other recent reels. The research post drew 64 comments on 270 likes: people want to talk about this, not just look at it.

Three content pillars

1 · READING THE HABITAT

Species and where they grow: ceps in spruce, fly agarics in conifers, fenugreek milk caps where pine meets bog myrtle.

2 · WHY YOU FORAGE

Sustainability, nature connection and your research into foraging and wellbeing, for people and for whole ecosystems.

3 · THE SEASONAL KITCHEN

Mushrooms on toast with thyme, marrows and crown prince squash from the garden, slow weekends at home.

WHERE THE NUMBER COMES FROM

From followers to *buyers*, step by step.

Every figure here is an estimate built on one fixed model, the same one we use for every audit. Nothing rests on numbers you haven't published.

F • Followers	20,450
Public follower count	
E • Engaged audience	1,022
5% of 20,450 = 1,022.5, rounded down to whole people	
B • Buyers	51
5% of 1,022 = 51.1, rounded down (about 0.25% of followers)	

The four products

PRODUCT	PRICE	WHAT THE FIGURE RESTS ON	REVENUE (ESTIMATE)
Ebook	\$29	51 buyers × \$29	\$1,479
Online course	\$200	51 buyers × \$200	\$10,200
Group coaching (8 weeks)	\$500	2 to 8 people per cohort; 48 places a year	\$1,000–\$4,000 per cohort \$24,000 a year
One-to-one coaching (8 weeks)	\$1,500	1 to 20 hours a week; capped at 51 buyers a year	\$1,500–\$30,000 per 8 weeks \$76,500 a year

GROUP COACHING, WORKED OUT

Per 8-week cohort: $2 \times \$500 = \$1,000$, up to $8 \times \$500 = \$4,000$.
Per year: six cohorts hold up to 48 places (8×6).
With 51 buyers you can fill all 48, so $48 \times \$500 =$
\$24,000 a year.

ONE-TO-ONE, WORKED OUT

Per 8 weeks: $1 \text{ client} \times \$1,500 = \$1,500$, up to $20 \times \$1,500 = \$30,000$.
Per year: six blocks hold up to 120 programmes (20×6), but you have 51 buyers, so with 51 buyers, one-to-one could make you $51 \times \$1,500 =$
\$76,500 a year.

WHERE THE NUMBER COMES FROM · CONTINUED

The range, and the *middle* of it.

Minimum **\$1,479**

Always the ebook sales: $51 \times \$29$

Maximum **\$76,500**

The largest year figure: one-to-one \$76,500 beats group \$24,000 and the course \$10,200

Median · estimate **\$6,350**

Figures in order: \$1,479, \$2,500, \$10,200, \$15,750. Middle two: $(\$2,500 + \$10,200) \div 2$

Mean · estimate **\$7,482**

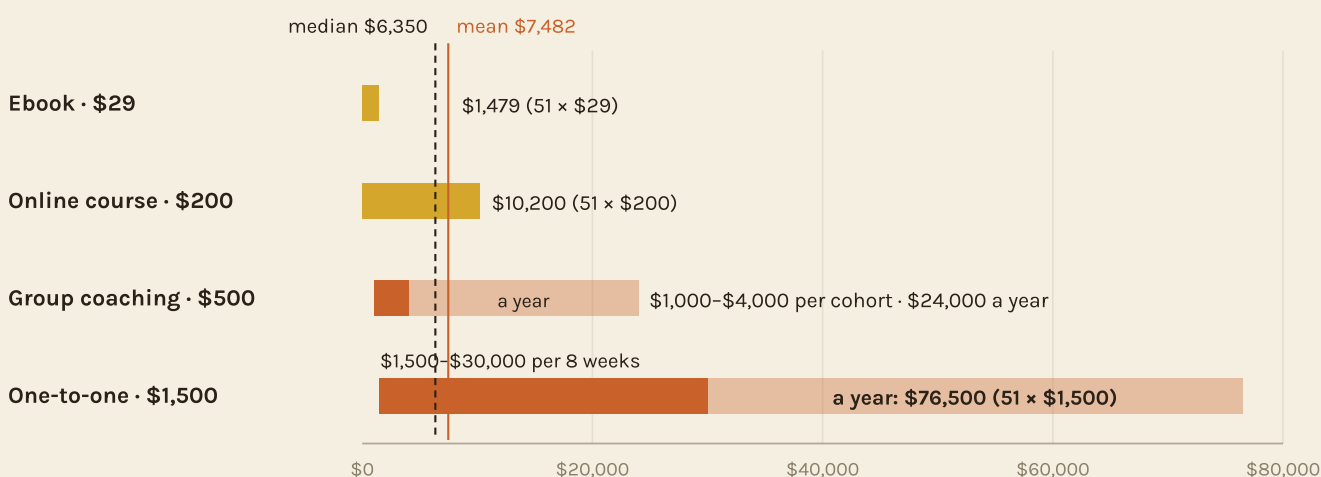

$(\$1,479 + \$10,200 + \$2,500 + \$15,750) \div 4 = \$29,929 \div 4 = \$7,482.25$

Mid-range · estimate **\$38,990**

$(\$1,479 + \$76,500) \div 2 = \$77,979 \div 2 = \$38,989.50$

For the median and mean, each coaching product is counted at the middle of its 8-week range: group coaching $(\$1,000 + \$4,000) \div 2 = \$2,500$; one-to-one $(\$1,500 + \$30,000) \div 2 = \$15,750$. The mid-range uses the year maximum. Mean and mid-range are rounded to the nearest dollar.

All four on one scale

Darker bars are one 8-week block; lighter bars show the rest of a year (six blocks), capped at your 51 estimated buyers. All figures are estimates.

THE PRODUCT LADDER

Four ways to teach *reading the habitat*.

\$29

EBOOK

A seasonal guide to reading habitats and weather for wild food in Scotland

With your recipes. For followers who want to start reading the ground themselves, at their own pace. Autora writes it from your posts; all you do is confirm it's ready to go out, checking every identification detail.

51 × \$29 = \$1,479 (estimate)

\$200

ONLINE COURSE

Read the Habitat

Filmed forays showing how you decide where to look, what to check and how to cook it. For people who can't get to one of your events in person.

51 × \$200 = \$10,200 (estimate)

\$500

GROUP COACHING

The seasonal foraging group

An online group in 8-week cohorts of 2 to 8 people, with live sessions each season where members plan forays and share what they found. For people who want to keep going, with company.

\$1,000–\$4,000 per cohort · \$24,000 a year (48 × \$500), estimate

\$1,500

ONE-TO-ONE

Eight weeks of foraging mentoring

One hour a week with one person building their own foraging practice: planning forays, reading habitats and reviewing finds.

\$1,500–\$30,000 per 8 weeks · \$76,500 a year (51 × \$1,500), estimate

PRODUCT	PRICE	FORMAT	ESTIMATE
Ebook	\$29	Download	\$1,479
Online course	\$200	Filmed forays, self-paced	\$10,200
Group coaching	\$500	8 weeks, 2–8 people	\$24,000 a year
One-to-one	\$1,500	8 weeks, 1 hour a week	\$76,500 a year

WHO DOES WHAT

You forage and teach. *We run the rest.*

Autora hosts and runs everything: the format, the build, the platform and hosting, the checkout and payments, delivery, the marketing and the backend. There is nothing to pay upfront. Autora is paid from a share of what it makes.

Your part

EBOOK

Confirm it's ready to go out, checking every identification detail. Next to no work.

ONLINE COURSE

Film your forays and send us the footage.

GROUP COACHING

Run the live sessions each season.

ONE-TO-ONE

Run the weekly hour with each client.

What Autora does

EBOOK

Writes it from your posts, designs it, sells it and delivers it.

ONLINE COURSE

Turns your footage into the course, hosts it, sells it and delivers it.

GROUP COACHING

Sales page, booking, payments, onboarding and marketing.

ONE-TO-ONE

Sales page, booking, payments, onboarding and marketing.

WHAT YOU NEVER HAVE TO DO

Build a website, set up a checkout, host video, chase payments or write sales emails. Your time goes on the forest and on the people you teach.

OFFER DETAIL

What goes *inside* each one.

The seasonal habitat guide

\$29 ebook

INSIDE	Habitats and weather season by season in Scotland: where moisture holds after a dry spell, what grows in spruce, pine and bog myrtle edges, with your recipes alongside.
PROMISE	You'll start to see why a place might yield something, not just what to look for.
YOUR PART	Autora writes it from your posts. You confirm it's ready to go out, checking every identification detail.
FIRST STEP	We gather your habitat posts and draft the first season.

Read the Habitat

\$200 course

INSIDE	Filmed forays: how you decide where to look, what you check on the ground, and how you cook it at home. Identification is framed as learning, to be checked in person before anything is eaten.
PROMISE	Learn to read a habitat the way you do, season by season, from wherever you live.
YOUR PART	Film the forays and send us the footage. Autora turns it into the course, hosts it, sells it and delivers it.
FIRST STEP	Film your next foray with the course in mind.

OFFER DETAIL · CONTINUED

The two *coaching* offers.

The seasonal foraging group

\$500 · 8 weeks

INSIDE	An online cohort of 2 to 8 people. Live sessions each season where members plan forays and share what they found.
PROMISE	A season of foraging planned and reviewed with you and a small group, not alone.
YOUR PART	Run the sessions. Autora handles the sales page, booking, payments, onboarding and marketing.
FIRST STEP	Pick the season for the first cohort once the waitlist is open.

Foraging mentoring, one to one

\$1,500 · 8 weeks

INSIDE	One hour a week for eight weeks with one person building their own foraging practice: planning forays, reading habitats and reviewing finds.
PROMISE	Eight weeks of your eye on their ground, until they can read it for themselves.
YOUR PART	Run the sessions. Autora handles the sales page, booking, payments, onboarding and marketing.
FIRST STEP	Decide how many hours a week you want to give it, between 1 and 20.

LAUNCH PLAN

Ask first. *Then* build.

The audit infers that some followers can't get to an event in person. You haven't said how many, so that is the first thing to test.

1

NOW, WHILE IT'S MUSHROOM SEASON

Ask in your story

Ask followers who can't make an event whether they'd learn online, season by season. Then post the four-slide test on the next page.

2

YOUR NEXT FORAYS

Film with the course in mind

Keep the camera on the decision, as you did after the dry spell: why the boggy edges, what you checked, and what you cooked from it. Send the footage to us.

3

ONCE PEOPLE HAVE SAID YES

Open a waitlist, then launch

Everyone who commented "FORAGE" goes on the waitlist. Launch with a clear date and a real close.

THE SKILL YOU'RE SELLING, IN YOUR WORDS

"It had been dry so I figured going to the edges where the bog myrtle was (and there was still pine) could yield some interesting results. And it did! Bog myrtles grow where its boggy so more moisture"

Leanne, in a DM on 01/10, on the fenugreek milk cap foray.

THE FIRST POST

A four-slide test, *in your voice*.

Built from your own foray. It tests one thing: whether people want to learn to read a habitat online.

- 1 Why did I check the boggy edges after a dry spell?
- 2 Bog myrtle grows where it's wet, so the moisture holds there when everything else dries out.
- 3 I'm thinking of filming my forays, so you can learn to read a habitat, season by season.
- 4 Comment "FORAGE" if you'd want it.

PAIR IT WITH

Photos from the pine and bog myrtle foray, so slide 2 shows the edge itself.

DON'T

Ever suggest anyone can safely eat a wild mushroom identified from a video or photo: it's about reading habitats, with identification checked in person. And don't invent demand.

WHAT TO DO NEXT

Post the four slides. Count the "FORAGE" comments. *Then we decide what to build first.*

Reply to this DM and I'll walk you through the numbers and what to build first.

Nothing to pay upfront. You film and teach; Autora hosts and runs everything else.

Prepared by Euan Grant · Autora AI Automation · October 2026

All figures are estimates based on public profile data and the audit, using a fixed model: 5% of followers engaged, 5% of those buying.

I build automations, and I used AI for the analysis, which is why this took an evening rather than a fortnight.
