

Dr Sarah Lobegeiger de Rodriguez

@CADENZA.CO · 21,489 FOLLOWERS · VERIFIED · EST. 2013

You turn brilliant executives into speakers whose voice carries the authority they already have.

MONOTONE

AGILE

ESTIMATE

\$30,000

per cohort

Estimate: one 8-week cohort, 20 deliberately limited spots at \$1,500, filled from the 1,074 followers who already engage with you — that is 1.9% of them. This is the conservative case; the full workings are on page 03.

WHAT IS INSIDE

1. What your numbers say
2. Where the number comes from
3. The three-offer ladder, priced
4. Offer detail and the first build step
5. The six-phase launch plan
6. The carousel to post this week

SECTION ONE

What your numbers say

Public data from your profile, and the engagement the audit recorded on your own posts. Nothing here is borrowed from anyone else's account.

21,489	5,868	27.46%	1,658
FOLLOWERS	AVERAGE LIKES	ENGAGEMENT RATE	POSTS SINCE 2013

The post that proves the demand. Your breakdown of the monotone speaking voice recorded **70,281 likes, 374 comments and over 1.3 million views**. The audit found it outperformed everything else on the account by an astronomical margin. Executives are not curious about vocal range in the abstract. They are frightened of sounding flat in the one meeting that matters.

YOUR THREE CONTENT PILLARS

PILLAR	WHAT IT DOES	ENGAGEMENT RECORDED	SALES POTENTIAL
1. Eliminating the monotone voice & vocal agility	Names the fear directly: flat, boring, uncommitted	70,281 likes, 374 comments, 1.3m+ views	High
2. Turn of phrase & perceived power	How listeners judge authority, competence and fairness through word choice	9 likes, 1 comment — low reach, sharp topic	High
3. Vocal science & classical technique	Opera technique, facial anatomy, posture — elite credibility	6 to 61 likes across posts	Medium

Verdict: the engagement on the monotone breakdown proves intense, pent-up demand. An elite, high-proximity solution addressing that exact insecurity will convert with high efficiency.

SECTION TWO

Where the number comes from

Every figure in this document is built from the four inputs below. If you disagree with an input, change it and the arithmetic moves with you.

INPUT	VALUE	WHERE IT COMES FROM
Follower base	21,489	Public profile data
Engaged audience, at 5%	1,074	The audit's conservative market premise. Your public engagement rate reads far higher than 5%, so this is a deliberately cautious floor
Program spots	20	Capped by delivery, not by demand — live acoustic feedback and personalised drills cannot be given to a crowd
Price per spot	\$1,500	Premium, limited-spots positioning for senior executives and elite sales leaders

THE MATHS

20 spots × \$1,500 = \$30,000 per cohort.

Filling 20 spots means converting **20 of the 1,074** people who already engage with you: **1.9%**. Not 1.9% of 21,489 followers — 1.9% of the engaged pool only.

Labelled an estimate. It rests on one assumption: that roughly one in fifty of the people already commenting, saving and replying will pay \$1,500 for direct access to a speech pathologist with a PhD in opera who has trained 1,800+ speakers.

Continued overleaf: the low case, the estimate and the twelve-month ceiling, side by side.

SECTION TWO · CONTINUED

Low case, estimate, ceiling

Three scenarios on the same inputs. The cover shows the middle one because it is the one you can defend to yourself.

SCENARIO	WHAT HAS TO BE TRUE		SHARE OF THE 1,074 REVENUE	
LOW Half a cohort	10 spots sold at \$1,500, one cohort		0.9%	\$15,000
ESTIMATE Full cohort	20 spots sold at \$1,500, one cohort		1.9%	\$30,000
CEILING Twelve months	Two full cohorts (\$60,000) plus the masterclass at 2.5% (\$8,019) and the sprint at 3% (\$6,304)		7.3%	\$74,323

WHAT THESE NUMBERS ARE NOT

- They are **estimates, not forecasts**. They describe what your existing engaged audience could support, not what will happen.
- The ceiling assumes you run the cohort **twice** and that the two lower-priced offers exist. On the cover it does not appear, because nothing has been built yet.
- The ceiling also assumes some people buy more than one thing. At 7.3% of the engaged pool, that is roughly one in fourteen of the people who already engage buying something in a year.
- Your reach is uneven: one post did 1.3m views, others did fewer than 250. The launch plan on pages 09 and 10 is built to concentrate attention rather than rely on it.

The honest read. You do not need new followers. You need 20 of the 1,074 people already listening to be given something to buy.

SECTION THREE

The product ladder

One premium offer to carry the revenue, two lower rungs to catch the people who are not ready for \$1,500 but replied to the monotone post anyway.

OFFER	PRICE	LOW	HIGH
The Executive Resonance Protocol 8-week cohort mentorship, 20 spots · senior executives, founders, elite sales leaders	\$1,500	10 spots \$15,000	20 spots \$30,000
The High-Stakes Turn of Phrase Masterclass Linguistic precision, verbal framing, hostile Q&A and media · experts who speak to press and boards	\$297	1% = 11 \$3,267	2.5% = 27 \$8,019
The 14-Day Vocal Stamina & Range Sprint Rapid acoustic protocol before a keynote · busy speakers with a date in the diary	\$197	1.5% = 16 \$3,152	3% = 32 \$6,304
One cohort cycle, all three rungs	—	\$21,419	\$44,323

Assumptions. The \$1,500 cohort price and 20-spot cap come from the audit. The \$297 and \$197 prices are mine, set to sit sensibly beneath the cohort so it remains the obvious premium choice. Conversion rates are applied to the engaged audience of 1,074 only, at 1%–3%, with the lowest rate on the highest price. Seat counts are rounded down to whole people. All figures are estimates.

SECTION FOUR · OFFER ONE

The Executive Resonance Protocol

\$1,500 · 8 weeks · 20 spots, capped. The big bet, and the offer the monotone post has already pre-sold.

WHAT IS INSIDE

- A one-to-one vocal diagnostic at intake: pitch range, agility, habitual note, breath support — assessed the way a speech pathologist assesses, not the way a confidence coach guesses.
- Live acoustic feedback sessions where they speak, you interrupt, and they hear the difference in the same minute.
- Personalised drills from the Cadenza Method, prescribed to their diagnostic rather than handed out identically.
- Rehearsal of their real material: the board update, the investor pitch, the press answer.
- A closing re-test against the intake diagnostic, so the change is measured, not felt.

THE PROMISE

Your voice stops sitting on one flat note, so the room stops deciding you are uncommitted before it has heard your argument.

WHO IT IS FOR

Senior executives, founders and elite sales leaders who know their delivery is leaking authority in front of boards, investors and clients — the people who watched the monotone breakdown and recognised themselves.

THE FIRST STEP TO BUILD IT

Write the three-minute intake diagnostic script and decide the single before-and-after measure you will report to each client (pitch range used, in semitones, is the obvious one for you). Fix two cohort dates, cap the list at 20, and point **cadenza.co/links** at a short application form. Nothing else needs to exist before you can take a deposit.

Revenue: \$15,000 at 10 spots, \$30,000 at 20. Estimate.

SECTION FOUR · OFFER TWO

The High-Stakes Turn of Phrase Masterclass

\$297 · live once, then sold as a recording. This is the rhetoric offer, not the vocal one.

WHAT IS INSIDE

- Verbal framing: how a single word choice decides whether an answer reads as fair, evasive or commanding — the territory of your post on how one word can dismiss a nation.
- Precision over volume: why long-winded, tangential answers sound less expert, and how to cut to the shortest credible answer under pressure.
- Reading the room before you answer — the social intelligence layer from your Q&A post, where an identical answer lands or dies depending on the occasion.
- Likeability and competence handled as two separate jobs, not one trade-off.
- A hostile Q&A and media-interview drill set they can run before an appearance.

THE PROMISE

You stop losing the room in the questions, after you have already won it in the presentation.

WHO IT IS FOR

Experts, spokespeople and leaders who face press, panels and board scrutiny — the audience for your pillar two content, which the audit rated high sales potential despite low reach.

THE FIRST STEP TO BUILD IT

Run it live, once, to the first eleven people who reply to the carousel on page 11. Charge \$297, record the session, and sell the recording afterwards. The live cohort pays for the build and gives you the questions that become the curriculum.

Revenue: \$3,267 at 1% of the engaged audience (11 seats), \$8,019 at 2.5% (27 seats). Price and conversion assumptions are mine, not the audit's. Estimate.

SECTION FOUR · OFFER THREE

The 14-Day Vocal Stamina & Range Sprint

\$197 · self-paced, 14 days. The rung for the person with a keynote in three weeks and no time for a cohort.

WHAT IS INSIDE

- Fourteen short daily drills — ten minutes each — expanding pitch agility from the habitual flat note outwards.
- A stamina protocol for the day before and the morning of a long speaking commitment, so the voice does not fatigue halfway through.
- A pre-stage warm-up they can run in a car park or a green room without sounding ridiculous.
- A day-one and day-fourteen recording task, so they hear their own range change rather than taking your word for it.

THE PROMISE

Two weeks of ten-minute drills, and your voice has the range to hold a room for the length of the keynote.

WHO IT IS FOR

The large group who watched the monotone reel, agreed with it, and want the physiological fix immediately without applying for anything.

THE FIRST STEP TO BUILD IT

Record the fourteen drills in one afternoon in your usual studio setup, in the order you would prescribe them clinically. Release it only to the people who replied to the validation carousel — it is the cheapest way to find out how many of the monotone audience will actually pay, and it feeds applications up to the \$1,500 cohort.

Why this rung matters. It converts the reach you already proved you can generate. The cohort converts trust; the sprint converts attention.

Revenue: \$3,152 at 1.5% of the engaged audience (16 buyers), \$6,304 at 3% (32 buyers). Price and conversion assumptions are mine, not the audit's. Estimate.

SECTION FIVE

The launch plan

Six phases, as set out in the audit, with what to post at each one. The whole sequence exists to move people from your feed into a place where you can speak to them directly.

01 Build up

Engage the community and tease that something is coming. Interactive stories only: polls, question boxes, DMs. Use the pain points you already know convert — does your voice sit on one note, do people check their phones when you speak, does your voice give out before the end of the keynote. High interaction is the goal, not announcements.

02 Invitation

Announce that it is on the way and invite your audience into a private group (WhatsApp or Telegram) where all the detail will be revealed first. Tease the time-limited bonus without describing it.

03 Anticipation

Build curiosity inside the group. Share what the protocol changes, the kind of before-and-after the intake diagnostic produces, and make the timeline crystal clear — dates, spot count, how the application works — so nobody is deciding logistics on the day doors open.

Continued overleaf: reveal, conversion and close.

SECTION FIVE · CONTINUED

The launch plan, continued

04 Reveal

Deliver the full breakdown in the group: what is included, the exclusive bonus, the \$1,500 price, and the open and close dates. Leave no doubt about what is on offer or what the 20-spot cap means.

05 Conversion

Send the application link for one of the 20 limited spots. Run a poll to see who is in and who has questions, then follow up one-to-one in the DMs with everyone who raises a hand. That is where most of the twenty spots will actually be sold — a \$1,500 decision is made in conversation, not in a caption.

06 Urgency

Countdown messages at 24h, 12h, 6h, 2h and closed, each making it concrete what staying out costs them in the next boardroom or press appearance. The close must be real. Reopening destroys credibility for the next launch, and you are planning to run this twice.

Before any of it. Post the carousel on the next page first. If the replies do not come, you have spent an evening rather than eight weeks, and you change the offer before you build it.

Phases as described in the audit. Post-level detail drawn from your own content themes.

SECTION SIX

The first post

Post this carousel — black background, white text — before you build anything. It tests the one demand your numbers already proved.

CAROUSEL · THREE SLIDES

Slide 1 — the hook

You have the title, the credentials, and the data. So why does the room check their phones the moment you start speaking?

Slide 2 — the agitation

It is not your slide deck. It is your vocal range. When your voice sits on a single flat note, your audience subconsciously decides you are uncommitted and uninspired — no matter how brilliant your ideas are.

Slide 3 — the call to action

I developed a clinical framework used by opera singers and C-suite executives to restore vocal agility and command rooms effortlessly. Reply 'I WANT' if this resonates with you.

THE STORY TO RUN THE SAME DAY

Poll: **“Has anyone ever told you your speaking voice sounds flat?”** — Yes / Never, but I suspect it.

Follow with one question box: **“What is the next room you have to hold?”**

Board, investors, press, stage. Their answers tell you which offer to lead with, in their own words.

WHAT TO DO WITH THE REPLIES

Every 'I WANT' gets a reply from you, not a link: one question about the room they have to hold next, and one line offering to tell them when the 20 spots open. That list is where the first ten of the twenty come from.

CLOSING

What to do next

Twenty of the 1,074 people already listening to you. That is the whole job.

STEP THIS WEEK

- 1 Post the carousel and run the story poll. Reply to every 'I WANT' by hand.
- 2 Write the three-minute intake diagnostic and fix two cohort dates. Cap it at 20 and say so.
- 3 Point cadenza.co/links at an application form, then open the private group and start phase one.

Reply to this DM and I'll walk you through the numbers and what to build first.

Prepared by Euan Grant · Autora AI Automation · September 2026

All revenue figures in this document are estimates based on public profile data and this audit. They describe what your current engaged audience could support; they are not forecasts or guarantees.

How this was made: I build automations for a living, and used AI to do the content and engagement analysis behind these numbers. That is why this took an evening rather than a fortnight.

SL
