

MONETISATION AUDIT

Test Creator

@zz.routine.test

Home sourdough for busy parents: turning flat, dense loaves and wasted flour into a reliable weekly bake that fits around the school run.

18,400

followers

920

engaged audience (5%)

£39

first product

ESTIMATE · CONSERVATIVE CASE

£1,076

 from one launch

Estimate: a single £39 bake system bought by 3% of the 920 followers who already engage with your starter and schedule posts.

02 What your numbers say

09 Your first post

WHAT YOUR NUMBERS SAY

Your followers aren't asking for more loaves. They're asking what went wrong with theirs.

18,400

Followers (from the audit)

4,210

Likes on the "my starter died" reel, your strongest post

312

Comments on that reel, most describing their own starter

1**Starter rescue** **HIGH POTENTIAL**

4,210 likes and 312 comments on the "my starter died" reel. Most comments ask what went wrong with *their* starter: that is a problem people want solved, not just content they enjoy.

2**The weeknight bake schedule** **HIGH POTENTIAL**

1,980 likes and 146 comments on the 20-minutes-hands-on timetable carousel, with repeated requests for a printable version. People are asking you for the product by name.

3**Kids in the kitchen** **MEDIUM POTENTIAL**

870 likes and 41 comments. It builds warmth and trust, with less buying intent. Keep it as the reason people stay, not the thing you sell first.

YOUR THREE CONTENT PILLARS

Rescue

Fixing the starter and the flat loaf.

Routine

A bake that fits around the school run.

Family

Small hands helping, weekend bakes together.

WHERE THE NUMBER COMES FROM

Four numbers, multiplied. Nothing hidden.

The cover figure is built from your follower count, a cautious share of people who actually engage, a modest conversion rate and one price. Here is each step, so you can check it yourself.

Followers	18,400
Engaged audience: $18,400 \times 5\%$ (the audit's market premise)	920
Buyers, conservative: $920 \times 3\% = 27.6$	≈ 28
Conservative estimate: $920 \times 3\% \times £39 = £1,076.40$	£1,076
Buyers, optimistic: $920 \times 6\% = 55.2$	≈ 55
Optimistic ceiling: $920 \times 6\% \times £39 = £2,152.80$	£2,153

The assumptions. Only 5% of your 18,400 followers are treated as your real market, the people who like, comment and save. Of those, 3% buy in the conservative case and 6% in the optimistic case. Both figures are estimates for a single launch of one £39 product, before any repeat sales or new followers. Revenue uses unrounded buyer numbers, so £1,076 is 27.6 buyers at £39. The ebook is an added estimate: $920 \times 1.5\% \text{ to } 3\% \times £19 = £262 \text{ to } £524$ (page 06), a lower share than the System because it is sold on its own, after launch; it is not part of the cover figure.

Why 3% is believable here: 312 people commented on one reel asking about their own starter, and the schedule carousel drew repeated requests for a printable version. 28 buyers is fewer than one in ten of those commenters.

THE PRODUCT LADDER

One lead product, three ways in and further.

Start with the system people are already asking for. The ebook is the low-cost way in; the clinic and the club come later, for the people who want more of you.

£39 one-off	The Weeknight Sourdough System Printable bake schedule, starter rescue guide and 12 recipes with 20 minutes hands-on. For parents who bake at weekends and want a weekday loaf.
£19 ebook	Flat Loaf Fixes A troubleshooting ebook for flat, dense loaves and wasted flour. For the parent not ready for the full System.
£15 one-off	Starter Rescue Clinic A short video course on reviving a neglected starter. For the people in the comments whose starter has gone quiet.
£9 a month	Family Bake Club A monthly recipe and a live bake-along with the kids. For families who already love your kitchen posts.

PRODUCT	PRICE	BUYERS (3-6%)	REVENUE ESTIMATE
Weeknight Sourdough System	£39	28-55	£1,076-£2,153
Flat Loaf Fixes (ebook)	£19	14-28*	£262-£524
Starter Rescue Clinic	£15	28-55	£414-£828
Family Bake Club	£9 / month	28-55	£248-£497 / month

The System's range is the audit's own figure. The Clinic and Club rows apply the same premise (920 engaged × 3% to 6% × price) as an illustration; the ebook* uses 1.5% to 3% (page 03). None are added to the cover figure: the buyers would largely be the same people.

OFFER DETAIL · LEAD PRODUCT

The Weeknight Sourdough System **£39**

"A real loaf on a school night, with 20 minutes of hands-on time, even if your starter has been sulking."

What's inside

- The printable weeknight bake schedule, the version of your timetable carousel people keep asking for.
- A starter rescue guide: what went wrong and how to bring it back.
- 12 recipes, each needing 20 minutes of hands-on time.

Who it's for

Parents who already bake at weekends and want a loaf on a weekday, without the bake taking over the evening.

Why it will sell

It answers the most-asked question under your starter reel, and it is the printable version your carousel commenters requested.

FIRST STEP TO BUILD IT

Turn the timetable from your 20-minutes-hands-on carousel into a one-page printable. That page is the heart of the product, and two pages of it become your Phase 2 preview.

OFFER DETAIL · THE EBOOK

Flat Loaf Fixes

£19

"Why your loaf came out flat, and what to change on the next bake, so no more flour goes in the bin."

What's inside

- A diagnosis section for flat and dense loaves: what each result tells you went wrong.
- The fix for each one, written for a kitchen that also runs a school run.
- The answers to the questions left under your "my starter died" reel and your Phase 1 checklist carousel.

Who it's for

Parents who have tried sourdough, ended up with a flat loaf and wasted flour, and want to know why before committing to a weekly bake.

How it fits

At £19 it sits below the £39 System as the low-cost way in. It sells best after the System launch, to the people who didn't buy.

Estimate, low: $920 \text{ engaged} \times 1.5\% = 13.8 \text{ buyers} \times £19$

£262

Estimate, high: $920 \text{ engaged} \times 3\% = 27.6 \text{ buyers} \times £19$

£524

Assumption: a lower share than the System, because the ebook is sold on its own and many of the most keen buyers will already have the System. These buyers are largely the same people, so the figures are not added to the cover.

FIRST STEP TO BUILD IT

Go through the 312 comments on your "my starter died" reel and the questions from the Phase 1 carousel, and turn the most repeated ones into the chapter list.

OFFER DETAIL · NEXT STEPS UP

For the people who want more.

Starter Rescue Clinic

£15

"Your starter isn't dead. Here's how to bring it back."

- **What it is:** a short video course on reviving a neglected starter.
- **Who it's for:** the commenters under your "my starter died" reel describing their own starter.
- **First step:** film the rescue you already know works, broken into short lessons that follow the rescue guide in the System.

Family Bake Club

£9 / month

"One recipe a month, baked together, small hands included."

- **What it is:** a monthly recipe and a live bake-along with the kids.
- **Who it's for:** families who love your kids-in-the-kitchen posts. The audit rates this demand as medium, so it comes after the System.
- **First step:** once the System has launched, invite its buyers to one free live bake-along and see who turns up.

LAUNCH PLAN

Three phases. Ask, show, then sell.

Each phase uses content you already make, and each one tells you whether to keep going before you've built much.

1**Ask**

START HERE

Post the starter-rescue checklist as a carousel

Lead with the topic behind your strongest reel. Collect questions in the comments: every "mine does this too" is a future buyer and a line for the rescue guide.

2**Show**

ONCE THE QUESTIONS COME IN

Open a waitlist for the printable schedule

Share two pages from it, so people can see exactly what they are getting. This is the version your carousel commenters asked for.

3**Sell**

LAUNCH WEEK

Launch to the waitlist with a 72-hour early price

Give the waitlist first access for 72 hours, then open the System to everyone.

YOUR FIRST POST

Test the demand before you build anything.

A three-slide carousel from the audit. Replies to slide three tell you how many people want the schedule, and give you your waitlist.

SLIDE 1

**Your starter
isn't dead. It's
hungry.**

SLIDE 2

**Three signs it
can be saved
tonight.**

SLIDE 3

**Reply
SCHEDULE and
I'll send you my
20-minute
weeknight bake
plan.**

How to read the result. Count the SCHEDULE replies. Each one is a person asking for the weeknight plan by name, which is exactly what the £39 System sells.

The conservative estimate needs about 28 buyers. If the replies comfortably pass that, you have your waitlist before the product exists.

WHAT TO DO NEXT

Three moves, in this order.

- 1 Post the three-slide starter carousel and count the SCHEDULE replies.
- 2 Turn your 20-minute timetable into the printable schedule and open the waitlist.
- 3 Launch the £39 Weeknight Sourdough System to the waitlist with a 72-hour early price.

Reply to this DM and I'll walk you through the numbers and what to build first.

Prepared by **Euan Grant** · Autora AI Automation · October 2026

All figures are estimates based on the audit and your public profile data, not guarantees of future sales.

How this was made: I build automations, and used AI for the analysis, which is why this took an evening rather than a fortnight.
