

T77 BMX

Tyler Sale · @t77bmx · 116,849 followers

BMX repairs, restorations and custom builds, filmed from a working UK workshop and taken out to skateparks and Amsterdam canals.

ESTIMATE · CONSERVATIVE CASE

£11,300 **est.**

Estimate: about £11,300 from one launch of one paid restoration series, before any affiliate tool income.

Assumption: 0.25% of your followers (about 290 riders) buy one £39 series in its first launch.

AUDIENCE SNAPSHOT

WHAT YOUR NUMBERS SAY

You have built a workshop audience at scale: riders who watch you strip, fix and rebuild bikes, and who come back for the next one. Figures below are public profile data from your latest posts.

YOUR THREE CONTENT PILLARS

01

**CUSTOM BUILDS
ON LOCATION**

Rare bikes rebuilt at the skatepark, in Amsterdam, in a secret spot. Your four biggest recent posts are all here.

02

**WORKSHOP
REPAIRS**

Headsets, wheels, stems and full restorations, the paid work your workshop already does.

03

**TOOLS AND HOW-
TOS**

The grip-install hack with @gt85spray and the 6mil Allen key set: method given away free.

THE OPPORTUNITY

THE GAP IN WHAT YOU OFFER

Your paid help only reaches bikes that physically get to your workshop. Your method reaches everyone who watches. Nothing sits in between.

OBSERVED

- ◆ About 117,000 followers watching detailed repair videos: grips, wheel rebuilds, tool reviews.
- ◆ A paid workshop service already exists, alongside your tool partnerships (@6miltools, @gt85spray) and the independent shop, @shifta.bike.
- ◆ There is no teaching product. The method is free in the videos; paid help needs the bike on your bench.

INFERRED, NOT YET CONFIRMED

- ◆ Some viewers can't use the workshop because of distance or your capacity.
- ◆ You haven't said how many. This audit treats it as the question to test, not a fact.

IN YOUR WORDS (DM, 24/09)

You pick each job by "what the bike actually needs, what will make the biggest difference to the rider, and what will make an interesting transformation to film", and you try "to keep it genuine rather than forcing a repair purely for content".

You already take on "paid BMX repairs, restorations and custom builds through my workshop".

THE TRANSFORMATION YOU COULD SELL

Riders who can't get their bike to you become riders who can **diagnose, repair and upgrade their own bikes** with workshop-grade technique and the right tools.

Verdict: the free videos already show the method. The gap is a structured, paid version for riders who want to do the job themselves, step by step, on their own bike. It sits next to the workshop rather than competing with it.

THE WORKING

WHERE THE NUMBER COMES FROM

This is a conservative estimate, not a promise. There is one assumption in it, and it is stated so you can check it against your own sense of your audience.

117,000 FOLLOWERS (ABOUT)	×	0.25% BUY (ESTIMATE)	×	£39 SERIES PRICE	=	£11,310 ONE LAUNCH (ESTIMATE)
--	---	-----------------------------------	---	----------------------------	---	--

STEP	BASIS	FIGURE
Follower base	Public data: 116,849, rounded	about 117,000
Share who buy in the first launch	Assumption, to be tested	0.25%
Buyers	$117,000 \times 0.25\%$, rounded down	about 290
Price per series	One paid restoration series	£39
Revenue, one launch	$290 \times £39$	£11,310

WHY 0.25% IS CAUTIOUS

290 buyers is about one in five of the people who like a typical post of yours (1,344 average likes, public data), and a fraction of the 8,584 who liked the Amsterdam wheel rebuild. The estimate does not need a viral launch to land.

WHAT IS NOT COUNTED

Affiliate income from the tool list inside the series, any second series, and workshop bookings the series might bring in. None of these are estimated here; the £11,310 stands on the series alone.

The cover rounds £11,310 to about £11,300. The real test of the 0.25% is the "BUILD" comment count on page 08.

WHAT TO SELL

THE PRODUCT LADDER

One new product, built on the work you already film, plus a way to fold the tool partnerships you already have into it. It sits beside the workshop, not on top of it.

00	YOUR WORKSHOP SERVICE Already running. Paid repairs, restorations and custom builds for riders who can bring their bike to you. Unchanged by this plan.	Existing NOT ESTIMATED
01	THE WORKSHOP-AT-HOME SERIES The main idea. One full restoration, stripped frame to finished bike, filmed the way you already film and broken into steps. For riders who watch the free videos and want to do the whole job themselves, but can't get their bike to you.	£39 PER SERIES
02	THE TOOL LIST INSIDE THE SERIES Each lesson lists the exact tools used, linked through the affiliate partnerships you already have. It turns those relationships into part of the product rather than a separate link in bio.	Included AFFILIATE

AT A GLANCE

PRODUCT	FOR WHOM	PRICE	REVENUE (ESTIMATE)
Workshop-at-Home Series	Riders who can't reach the workshop	£39	£11,310, one launch
Tool list inside the series	Every series buyer	In series	Not estimated
Workshop service	Riders who can bring their bike	Existing	Not estimated

Series estimate assumes 0.25% of about 117,000 followers buy (about 290 riders) in the first launch.

OFFER DETAIL

PRODUCT 01 · £39

THE WORKSHOP-AT-HOME SERIES

A paid video series that follows one full restoration from stripped frame to finished bike. It is the same work you already film, sequenced and finished properly, with each step broken out:

- 1** **Diagnosis.** What the bike actually needs, the first question you already ask on every job.
- 2** **What to replace and why.** The decisions that make the biggest difference to the rider.
- 3** **Tools.** The exact kit for each step, with the tool list below.
- 4** **The order of work.** Strip, repair, rebuild, in the sequence a workshop uses.

The promise: do the whole job yourself, step by step, on your own bike.

Why it fits you: it keeps your own rule of choosing work that genuinely matters to the bike, rather than forcing a repair for content. **First step:** pick one restoration you are already planning to film, and film it with the series in mind.

PRODUCT 02 · INCLUDED

THE TOOL LIST INSIDE THE SERIES

Each lesson ends with the exact tools used, linked through the affiliate partnerships you already have, such as the @6miltools Allen keys and @gt85spray you already feature.

The difference: the links sit at the moment a rider needs the tool, inside the lesson, not as a separate link in bio. **First step:** note every tool as you film the series restoration.

THE SEQUENCE

LAUNCH PLAN

Four steps, in this order. Nothing gets built until your riders have told you they want it.

01 ASK FIRST

Run a story poll or question box asking riders whether they would rather send their bike in or learn to do the job themselves. Then post the test carousel on the next page. This tests demand before anything is built.

02 FILM ONE RESTORATION FOR THE SERIES

Pick one restoration project you are already planning to film, and film it with the series in mind: diagnosis, parts, tools and order of work captured as separate steps.

03 WAITLIST, THEN A REAL LAUNCH

Invite interested riders, starting with everyone who commented "BUILD", to a waitlist. Open the series to them first, with a clear launch date and a real close.

04 DECIDE ON A SECOND SERIES

Use the replies and waitlist numbers to decide whether a second series is worth making.

WHAT TO WATCH

The estimate needs about 290 buyers. Your poll replies, "BUILD" comments and waitlist sign-ups are the first real evidence for or against that 0.25%, so count them before you film.

IMMEDIATE VALIDATION

THE FIRST POST

Post this as a carousel, or use it as a short reel caption over workshop footage, before building anything.

SLIDE 1

**CAN'T GET YOUR BMX TO
A WORKSHOP?**

t77bmx

SLIDE 2

**EVERY WEEK I STRIP, FIX AND
REBUILD BIKES LIKE THIS
ONE. MOST OF YOU WATCH
FROM TOO FAR AWAY TO SEND
YOURS IN.**

Workshop

SLIDE 3

**I'M THINKING OF FILMING
ONE FULL RESTORATION,
EVERY STEP, SO YOU CAN DO
IT ON YOUR OWN BIKE.**

Every step

SLIDE 4

**COMMENT "BUILD"
IF YOU'D WANT IT.**

BUILD**HOW TO READ IT**

The number of "BUILD" comments is the demand test. Put a restoration you have just finished behind slide 1, so the post looks like the rest of your feed.

NEXT

WHAT TO DO NEXT

- ◆ **This week:** run the story poll and post the "BUILD" carousel.
- ◆ **Count:** poll replies and "BUILD" comments. That is your demand test.
- ◆ **Then:** choose the restoration you were already going to film, and film it as the series.

LET'S TALK IT THROUGH

Reply to this DM and I'll walk you through the numbers and what to build first.

Prepared by **Euan Grant** · Autora AI Automation · October 2026

All figures are estimates based on public profile data and this audit. Each one shows the assumption behind it; none is a promise of results.

How this was made: Euan builds automations and used AI for the analysis, which is why this took an evening rather than a fortnight.
